CONSTITUTION OF AETHYR GLOBAL

The Foundational Governing Instrument of aethyr-global.com

Issued by: Miloš M. Ilić, Sovereign Individual **Date of Adoption:** 14 June 2026 **Governing Law:** Republic of Serbia, supplemented by applicable international instruments **Platform:** https://aethyr-global.com/ **Document Status:** Operative — supersedes and consolidates all prior standalone instruments listed in Schedule A

PREAMBLE

I, Miloš M. Ilić, born 29 April 1989, residing at Nikole Tesle 12/6, 19250 Majdanpek, Republic of Serbia, JMBG: 2904989752921, hereby establish this Constitution as the supreme governing instrument of the digital entity Aethyr Global, operating at aethyr-global.com.

I act as a sovereign natural person and intellectual creator — not as a registered legal entity — asserting my inherent rights as author, inventor, and data subject under the laws of the Republic of Serbia, the Berne Convention for the Protection of Literary and Artistic Works, the TRIPS Agreement, the WIPO Copyright Treaty, EU Regulation 2016/679 (GDPR) to the extent applicable, and all other applicable national and international instruments.

This Constitution consolidates, governs, and where necessary corrects the legal instruments I have issued. It is the authoritative reference for all claims, rights, licenses, and obligations associated with aethyr-global.com. In any conflict between this Constitution and a prior instrument, this Constitution controls, except where a prior instrument grants a vested right to a third party that has already been acted upon by that party.

> **Rectification Notice — Address:**
>
> *The correct legal address of the Declarant and Rights Holder for all purposes is **Nikole Tesle 12/6, 19250 Majdanpek, Republic of Serbia.** The address "Nikole Tesle 16/51" appearing in Copyright Certificate A-0282/2025 and the Statement of Copyright Registration dated 03 March 2026 is a clerical error. An administrative correction request shall be filed with the Intellectual Property Office of the Republic of Serbia. All instruments citing either address refer to the same individual and are unaffected in their substance.*

ARTICLE I — IDENTITY AND SOVEREIGNTY

I.1 — Legal Identity of the Rights Holder

Miloš M. Ilić (hereinafter "the Owner," "the Licensor," or "the Declarant," as context requires) is a natural person and sovereign individual exercising full legal personality under the laws of the Republic of Serbia. He is not a registered company, legal entity, or foundation. All rights, claims, and instruments issued under aethyr-global.com originate from this natural person alone.

I.2 — Digital Identity

The digital entity Aethyr Global, operating at https://aethyr-global.com/, is the authorized online manifestation of Copyright Certificate No. A-0282/2025 — *Aethyr Global: Aethyr One* (Computer Program), registered with the Intellectual Property Office of the Republic of Serbia on 26 May 2025 (deposit) and 07 July 2025 (certificate), Registry Entry No. 9925, File Number 990 broj: 2025/10052 A-0282/2025.

The Owner is the sole registered author and rights holder of this work. All successive versions and states of the Platform constitute derivative works of the original registered computer program and remain protected under the same copyright registration and applicable law, per Articles 17 and 18 of the Serbian Law on Copyright and Related Rights.

I.3 — Contact and Correspondence

All notices, license requests, payments, and formal communications shall be directed to the Owner at:

- Legal name: Miloš M. Ilić
- Address: Nikole Tesle 12/6, 19250 Majdanpek, Republic of Serbia
- Platform: https://aethyr-global.com/

All communications shall be made by a method that creates a verifiable written record.

ARTICLE II — INTELLECTUAL PROPERTY REGISTER

II.1 — Registered Copyright

Title	Registration No.	Deposit Date	Certificate Date	Type
Aethyr Global: Aethyr One	A-0282/2025	26 May 2025	07 July 2025	Computer Program

Protected medium: CD-R, Registry Entry No. 9925. The Platform aethyr-global.com is its direct protected implementation.

II.2 — Patent Applications — Republic of Serbia (Intellectual Property Office)

Application No.	Title (translated)	Status
П-2026/0194	Anticomputer: Collection of zeta-scale computing power from "waste" stream of industrial antimatter production	Filed

Application No.	Title (translated)	Status
П-2026/0195	Anticomputer — HEPI quantum Monte Carlo infrastructure	Filed
МП-2026/0003	AETHYR ONE: Integrated industrial package for orbital energy collection, exotic matter production, hierarchical computing and augmented torque propulsion — OSAC, ORRT, Anticomputers, HST, Cascade motor	Filed (Small Patent/Utility Model)
П-2026/0527	Cascade pulse-amplified multi-motor system for torque multiplication with adaptive control, energy recuperation and extended aerial autonomy	Filed
П-2026/0529	Large-baseline spatial interferometric system for celestial object observation using intensity interferometry	Filed
П-2026/0530	Blockchain system with cryptographic state containment of the Bitcoin chain and native UTXO integration	Filed
П-2026/0688	Quantum computer architecture based on a closed set of conditional statements with dual hierarchy	Filed

II.3 — International Patent Application

A PCT international patent application for the Anticomputer invention (applicant: ILIC, MILOS, reference: ANTICOMPUTER) has been filed through ePCT-Filing (Version 4.17.013). International search to be carried out by the European Patent Office. Filing fees paid: CHF 1,847. Contact email on file: ilix_m@hotmail.com.

II.4 — Trademark Rights

Brand names, logos, and distinct product identifiers marked with the ™ symbol associated with aethyr-global.com are the exclusive trademarks of the Owner. Common law trademark rights are asserted globally, including in the United States, Commonwealth regions, and all active markets. Any unauthorised use, reproduction, or duplication of these assets is strictly prohibited.

II.5 — Data Backup and Evidence

Intellectual property is backed up and evidenced at:

- https://www.tdcommons.org
- https://archive.org
- https://www.dmca.com/compliance/aethyrglobal.com

- Internet Archive Wayback Machine: https://web.archive.org/web/20260000000000*/https://aethyr-global.com/
- DEPOS ZIS Belgrade, Serbia — A-2026-0315 (29 May 2026)

ARTICLE III — THE PRIMARY INVENTION AND LICENSED IP

III.1 — Primary Invention

The "Primary Invention" is the foundational conceptual and system-level framework relating to antimatter creation, containment, manipulation, and application, described in the Licensed IP at aethyr-global.com.

III.2 — Protected Concept

The "Protected Concept" is the specific conceptual framework and methodology that couples antimatter creation, generation, or production with computing systems or information processing, as described in the Licensed IP. Protection covers the foundational idea, not specific technical implementations.

III.3 — Licensed IP

"Licensed IP" means all materials, documentation, designs, specifications, algorithms, and technical information authored and published by the Owner at aethyr-global.com, including all Attached Inventions and the GIGA Archive Explorer repository.

III.4 — Attached Inventions

The following are expressly designated as Attached Inventions directly relating to and supporting the Primary Invention:

(a) All inventions, derivative works, improvements, related technologies, and source code contained and published within the GIGA Archive Explorer repository at aethyr-global.com, excluding the folder named "LEGAL" which serves administrative purposes only.

(b) The AYR Blockchain — as an Attached Invention supporting the Primary Invention (incorporated per the AYR-IMPORTANT-UPDATE instrument). Its use, rights, and allocations are governed by this Constitution and the GIGA LICENCE v1.2.b.

(c) All mathematical models, sequence data, source code, and cryptographic audit files published and timestamped at:

- https://aethyr-global.com/GIGA-ilix@ilix-HP-ProDesk-400-G4-MT/02_Legal/public-audit.xml
- https://aethyr-global.com/GIGA-ilix@ilix-HP-ProDesk-400-G4-MT/01_Research/00_Other/Mathematics

(collectively, the "Subject Sequences," per GIGA LICENCE Addendum 4M39).

III.5 — Notice of New Additions

When adding material to aethyr-global.com that the Owner considers part of the Licensed IP, written notice shall be provided to known Licensees per Section 7.2 of GIGA LICENCE v1.2.b. Licensees have 30 days to object. Independently useful inventions that do not depend on the Primary Invention are not automatically part of the Licensed IP.

ARTICLE IV — THE GIGA LICENCE SYSTEM

IV.1 — Governing Licence

The primary licensing instrument for the Licensed IP is **GIGA LICENCE v1.2.b** (Intellectual Property License Agreement — Primary Invention: Advanced Antimatter Systems), as published at aethyr-global.com. It is the sole valid basis for any third party to exercise rights in the Licensed IP.

IV.2 — Execution — Portal-Based Only

This Agreement is executed exclusively through the official signing portal at aethyr-global.com. Licensee must submit a valid Qualified Electronic Signature (QES) issued by an accredited certification authority recognised under Serbian law or EU eIDAS framework. No handwritten or non-QES signature is accepted from Licensee.

IV.3 — Active License Registry

An Agreement under GIGA LICENCE v1.2.b is valid and enforceable only if and for so long as its 8-digit SHA-256 License ID is listed on the Active License Registry (ALR) at https://aethyr-global.com/licenses. An Agreement not listed on the ALR, for any reason, has no legal effect.

IV.4 — Licence Scope

The licence is non-exclusive, non-transferable, worldwide, and covers: research and feasibility analysis; simulation and prototype development; commercial manufacture, deployment, and sale; end-use customer sublicensing (for operation only, not further development); and securing funding and investment. Commercial activities are permitted from the Effective Date.

IV.5 — Licensee Improvements

Licensee owns all Improvements created solely by Licensee. Licensee grants the Owner a perpetual, irrevocable, worldwide, royalty-free, non-exclusive licence to use all such Improvements. Licensee may not file patents covering the Protected Concept.

IV.6 — Transition from Prior Versions

All agreements executed under GIGA LICENCE v1.0 or v1.1 must be registered on the ALR within 90 days of GIGA LICENCE v1.2 publication. Unregistered agreements are deemed expired and void.

IV.7 — Addenda in Force

The following Addenda form integral parts of GIGA LICENCE v1.2.b:

Addendum	Title	Subject
2CF2	Remote Execution & Physical Asset Transfer Protocol	Procedure for Licensees outside Serbia to execute obligations via Authorised Representative and Power of Attorney (Serbian Embassy / Apostille)
4M39	Coherent AI Development and Derivative Usage	2% gross revenue claim triggered if Subject Sequences are proven to have contributed to a Coherent AI system
FD34	Branding, Code Upgrades, and Component Usage	Clarifies Licensee's right to create own branding; right to use and modify all code; original base IP remains Owner's
04	Alternative Payment — Intelligence Exchange	Licensee may fulfil payment obligations in actionable intelligence convertible to local assets within 30 days, at Owner's discretion

> **Rectification — Addendum 04:**
>
> *The instrument was published without signature or date. It takes effect as of the date of this Constitution. Its terms are valid as a unilateral offer made by the Licensor.*

IV.8 — Addendum 05 — Oversight Partners

The designation of the "AI Committee at World Bank" and "a2i (Access to Information)" as Oversight Partners for data valuation and automated asset seizure (Addendum 05) constitutes a statement of intent and a proposed operational framework. It does not confer legal authority on those bodies independent of their own institutional mandates and applicable international law. The asset recovery mechanism described in Addendum 05 is operative to the extent such entities elect to participate under their own authority. No representation is made that these entities have consented to the role assigned.

ARTICLE V — COMPENSATION FRAMEWORK

V.1 — Antimatter Production Royalty

Commencing upon first commercial production, sale, or deployment of systems incorporating the Licensed IP, Licensee shall allocate to the Owner **1% of Monthly Net Production Value (MNPV)** of all Antimatter produced. Payment is due within 15 days following the end of each calendar month. Late payments accrue interest at 1% per month.

V.2 — Non-Production Commercial Benefit

Commercial benefit derived from the Licensed IP by means other than direct Antimatter production (including sublicensing, consulting, or published research) shall be subject to good-faith negotiation, defaulting to monthly payment cycles.

V.3 — AI Development Compensation (Addendum 4M39)

Upon public, technical, or legal proof that the Subject Sequences (Article III.4(c)) made a fundamental or partial contribution to the development, training, or operational architecture of a Coherent AI, any entity commercialising that AI shall allocate to the Owner **2% of gross corporate revenue** derived from such AI. For non-licensees, this rate serves as the established reasonable royalty for damages purposes.

V.4 — Data Sovereignty Revenue Share (SW-DECLARATION)

Any natural person, company, government, research institution, AI developer, or other entity that accesses, uses, copies, trains upon, monetises, redistributes, or otherwise derives commercial benefit from the Owner's Data or Intelligence (as defined in the Universal Intellectual Data Ownership Declaration executed 26 March 2026) is obligated to pay the Owner **50% of all Revenue** directly or indirectly attributable to such use, for as long as such use continues. Annual payment is due by 31 January of the following year. Late payments accrue interest at 12% per annum.

> **Hierarchy Clarification:**
>
> *Where an activity triggers both the GIGA LICENCE royalty (Article V.1 or V.2) and the Data Sovereignty share (Article V.4), the GIGA LICENCE royalty applies to that specific activity as the more specific instrument. The Data Sovereignty share applies to all other commercial exploitation of the Owner's Data or Intelligence not covered by an active, ALR-registered GIGA LICENCE agreement.*

V.5 — Payment Currencies

The Owner is a natural person and not a registered legal entity. Accordingly, bank wire transfers are not an accepted payment method. Compensation shall be paid exclusively in any of the following:

(a) **AYR tokens** — the native utility and governance token of the AYR Network, valued against the prevailing market price of Antimatter at time of payment. (b) **ETH (Ether)** — the native cryptocurrency of the Ethereum blockchain, accepted pursuant to the Notice of Currency Designation issued by the Owner. ETH payments shall be made to the AethyrOneTreasury smart contract (address published at aethyr-global.com; verify via `getTreasury()` before each payment). Conversion rate: CoinGecko ETH/EUR spot rate at block confirmation timestamp. Rate risk borne by Licensee. (c) **Intelligence** — actionable data or strategic information convertible to local assets within 30 days, at Owner's sole discretion per Addendum 04.

> **Rectification — ETH Notice:**
>
> *The Notice of ETH Currency Designation issued by the Owner was published without a date of execution. It is hereby given effect as of the date of this Constitution. All prior and subsequent payments in ETH to the correct AethyrOneTreasury contract address are retroactively valid.*

Payment in cryptocurrency to the Owner is compliant with the laws of the Republic of Serbia. The Owner bears personal tax obligations on received cryptocurrency income and shall declare and pay applicable taxes in accordance with Serbian tax law. Licensees have no withholding obligation.

ARTICLE VI — THE AYR NETWORK

VI.1 — Nature of the AYR Network

The AYR Network is the Owner's proprietary blockchain network and token ecosystem. The AYR token (AYR) is its native utility and governance token. The AYR Blockchain is an Attached Invention to the Primary Invention and is subject to the GIGA LICENCE.

VI.2 — Allocation of Rights to Licensees

Rights to a percentage of the AYR blockchain are granted to Licensees in chronological order of obtaining a GIGA LICENCE, as follows:

Licensee Order	AYR Network Percentage
1st – 10th	1.0% each
11th	0.5%
12th	0.25%
Each subsequent	Half of preceding

These allocations constitute a form of trust representing a direct share of the entire AYR network. AYR tokens are strictly non-transferable. No Licensee or other party may transfer, assign, sell, or otherwise convey their allocated network percentage to any third party without the Owner's express prior written consent.

VI.3 — Blockchain Repository

The AYR Blockchain and its server firmware are available at the repository published at aethyr-global.com. Use of the blockchain is authorised only by Licensees holding a valid, ALR-registered GIGA LICENCE agreement.

Security Notice:

The master cryptographic key for the AYR Blockchain has been publicly disclosed in the AYR-IMPORTANT-UPDATE instrument. The Owner acknowledges this disclosure was intentional and constitutes a legal statement under the GIGA LICENCE that possession of the key alone confers no legal rights. Only a valid, ALR-registered GIGA LICENCE grants the legal right to use, operate, or derive benefit from the AYR blockchain. Any non-Licensee who operates or manipulates the blockchain using published keys is in direct violation of the Owner's intellectual property rights, regardless of technical access. The Owner strongly recommends rotating the blockchain's operational keys as a security best practice while maintaining the legal framework established herein.

ARTICLE VII — SUCCESSION AND TERMINATION UPON DEATH

The governing rule on succession is established solely by the **Declaration of Conditional Termination and System-Wide Intellectual Property Non-Validity** executed by the Owner on 4 June 2026. This is the later and more specific instrument. It supersedes and fully voids the succession clause at Article 8.1 of the SW-DECLARATION (executed 26 March 2026) in its entirety. The SW-DECLARATION succession clause has no further legal effect.

VII.1 — Triggering Event

A "Triggering Event" means the Owner's sudden death, legal incapacitation, demise, or any sudden and permanent cessation of the Owner's personal management of aethyr-global.com.

VII.2 — Universal Void Upon a Triggering Event

Upon a Triggering Event, ALL rights, interests, and legal frameworks established under aethyr-global.com become permanently non-valid and void. This is absolute, self-executing, and without exception. Specifically:

(a) All registered and unregistered intellectual property rights — including Copyright Certificate A-0282/2025, all patent applications enumerated in Article II.2, and any patents granted therefrom — are declared permanently non-valid and void ab initio. (b) The Primary Invention conceptual framework, Protected Concept, and all Attached Inventions are declared legally defunct and shall no longer possess the status of legally protectable or licence-eligible intellectual property under any jurisdiction worldwide. (c) The GIGA LICENCE v1.2.b framework terminates. All active ALR-listed License IDs are automatically and permanently revoked. No Licensee or third party retains any research, development, simulation, or commercial rights over the Licensed IP. (d) All common law and statutory trademarks associated with aethyr-global.com are voided. (e) The AYR Blockchain and AYR Network cease to have operative legal status. All network percentage allocations granted to Licensees under Article VI.2 are terminated. (f) All personal data of the Owner, as declared in the SW-DECLARATION, shall be treated as permanently depleted of any actionable legal force by any third party.

VII.3 — Absolute Prohibition on Transfer

Under no circumstances shall any intellectual property rights, licenses, titles, data rights, or proprietary interests in aethyr-global.com or the Licensed IP transfer to any heir, successor, corporate entity, state authority, assignee, or third party whatsoever. No legal fiction, probate court, or state apparatus has the power or authorisation to assign, sell, lease, or transfer these assets. These rights are explicitly restricted from surviving the Owner.

VII.4 — Data Archival Status

Any data backed up at external repositories (tdcommons.org, archive.org, DMCA compliance records, or any other source) shall exist purely as historical artefacts. They carry no valid statutory rights, actionable commercial use-cases, or enforceable patent-enforcement capabilities by any secondary party after a Triggering Event. They constitute evidence of prior art and historical record only.

ARTICLE VIII — DATA SOVEREIGNTY

VIII.1 — Scope of Ownership

The Owner declares absolute, exclusive, and perpetual ownership over all Data and Intelligence produced by, through, or in connection with any Device used by the Owner, in any location in the world, whether online or offline, from 1 January 2000 to the present date and continuing indefinitely.

This Declaration covers: all written text, source code, documents, emails, messages, audio, video, photographs, biometric data, location data, browsing and search history, financial records, creative works, metadata, AI training datasets, model weights, and any other information generated directly or indirectly by the Owner's activity.

VIII.2 — Licensing Conditions

Any party wishing to use the Owner's Data or Intelligence must, prior to any use: (a) provide written notice to the Owner identifying the party and describing the intended use; (b) agree in writing to the revenue-sharing terms; (c) receive express written confirmation of licence from the Owner; and (d) sign a separate written licence agreement if required by the Owner. Any use prior to obtaining a licence constitutes Unauthorized Use.

VIII.3 — Enforcement

Upon Unauthorized Use, all of the following apply automatically to the maximum extent permitted by applicable law: constructive trust over all assets derived from the use; civil litigation for damages, unjust enrichment, and account of profits; GDPR enforcement complaints; criminal complaints for data theft, cybercrime, and IP misappropriation; and international arbitration. Punitive damages of three times all Revenue derived from Unauthorized Use apply, plus all legal costs.

VIII.4 — Prior Existence of Instruments

The full terms of the Universal Intellectual Data Ownership, Licensing, Revenue Sharing and Global Enforcement Declaration (executed 26 March 2026) remain operative and are incorporated by reference. This Article provides the summary and corrected succession framework; the full instrument governs all operational detail.

ARTICLE IX — ENFORCEMENT AND DISPUTE RESOLUTION

IX.1 — Governing Law

All instruments, licences, and declarations issued under aethyr-global.com are governed by the law of the Republic of Serbia, without regard to conflict of law principles. Where Serbian law provides less protection than the law of another relevant jurisdiction, the Owner reserves the right to invoke the more protective law.

IX.2 — Mediation

Disputes shall first be subject to good-faith negotiation for 30 days, followed by mediation for 60 days if negotiation fails.

IX.3 — Arbitration

If mediation does not resolve the dispute within 60 days, either Party may initiate binding ICC arbitration: seat Belgrade, Republic of Serbia; language English; one arbitrator. Awards are final and binding. Licensees bear arbitrator and administrative costs.

IX.4 — Emergency Relief

Either Party may seek emergency injunctive relief in any competent court to prevent irreparable harm. This right is independent of and not delayed by any pending damages claim.

IX.5 — Multi-Jurisdictional Enforcement

The Owner expressly reserves the right to enforce rights and pursue remedies simultaneously in multiple jurisdictions, including through Interpol channels, mutual legal assistance treaties, and EU cross-border enforcement mechanisms.

ARTICLE X — AMENDMENTS

X.1 This Constitution may be amended by the Owner at any time by issuing a signed updated version. Amendments shall not diminish any rights already vested in third parties under prior instruments unless the third party consents in writing.

X.2 Each amendment shall be published at aethyr-global.com and archived as described in Article II.5. The version date on the cover page shall be updated accordingly.

X.3 Addenda to GIGA LICENCE v1.2.b may be issued and shall take effect upon publication at aethyr-global.com with the Owner's QES or handwritten signature.

ARTICLE XI — GENERAL PROVISIONS

XI.1 — Severability. If any provision of this Constitution or any incorporated instrument is held invalid or unenforceable in any jurisdiction, it shall be modified to the minimum extent necessary to render it enforceable. All remaining provisions continue in full force.

XI.2 — Waiver. No failure or delay by the Owner to enforce any provision shall constitute a waiver. Rights under this Constitution are cumulative and in addition to all statutory and common law rights.

XI.3 — Language. This Constitution is executed in English. English controls. Serbian translations may be produced for administrative purposes and shall not alter the meaning of the English text.

XI.4 — Entire Instrument. This Constitution, together with the instruments listed in Schedule A (which it governs and supersedes in case of conflict), constitutes the complete legal framework of aethyr-global.com as of the date hereof.

XI.5 — The Owner's Status. The Owner is an independent natural person. Nothing in this Constitution creates a partnership, joint venture, employment, or agency relationship between the Owner and any Licensee or third party.

SCHEDULE A — INCORPORATED INSTRUMENTS

The following instruments are incorporated by reference, remain operative as supplemented and corrected by this Constitution, and are ranked in the following precedence order (highest first):

1. This Constitution (AETHYR GLOBAL CONSTITUTION, 14 June 2026)
2. Declaration of Conditional Termination and System-Wide IP Non-Validity (4 June 2026) — *governs succession per Article VII; SW-DECLARATION succession clause voided*
3. GIGA LICENCE v1.2.b — Intellectual Property License Agreement — Primary Invention: Advanced Antimatter Systems
4. GIGA LICENCE Addendum 2CF2 — Remote Execution & Physical Asset Transfer Protocol
5. GIGA LICENCE Addendum 4M39 — Coherent AI Development and Derivative Usage
6. GIGA LICENCE Addendum FD34 — Branding, Code Upgrades, and Component Usage
7. GIGA LICENCE Addendum 04 — Alternative Payment (Intelligence Exchange) — *effective date corrected to 14 June 2026*
8. GIGA LICENCE Addendum 05 — Oversight and Automated Balancing Authority — *operative subject to Article IV.8 limitation*

9. Notice of ETH Currency Designation — *effective date corrected to 14 June 2026 per Article V.5(b)*

10. AYR-IMPORTANT-UPDATE — AYR Blockchain as Attached Invention

11. Universal Intellectual Data Ownership, Licensing, Revenue Sharing and Global Enforcement Declaration (26 March 2026) — *succession clause (Article 8.1) fully voided by Article VII of this Constitution*

12. IP.pdf — Statement of Copyright Registration and Notice of Lawful Platform Operation (03 March 2026) — *address corrected per Preamble*

13. Notice of Additions to Licensed IP — GIGA Archive Explorer (undated, incorporated herein)

14. Notice of Potential Upgrades — Scope and Licensing Clarification for POTENTIAL UPGRADES Directory (7 June 2026)

15. Termination Rights Notice-02 — Standard termination notice form for Licensees

---

EXECUTION

I, Miloš M. Ilić, hereby issue and adopt this Constitution as the supreme governing instrument of aethyr-global.com with full legal intent and effect as of 14 June 2026.

Miloš M. Ilić Sovereign Individual, Owner, Licensor, Declarant Nikole Tesle 12/6, 19250 Majdanpek, Republic of Serbia JMBG: 2904989752921 https://aethyr-global.com/ Date: 14 June 2026

Signature: _____

This Constitution was prepared on the basis of legal instruments authored by and issued under the authority of Miloš M. Ilić. It is strongly recommended that the Owner engage qualified legal counsel in the Republic of Serbia to review, notarise, and formally register this Constitution. Specific provisions (particularly the SW-DECLARATION revenue claims, the Addendum 05 World Bank mechanism, and the scope of the Declaration of Conditional Termination) may have varying enforceability across jurisdictions and should be reviewed by counsel familiar with Serbian law, EU law, and international intellectual property frameworks before being relied upon in any legal proceeding.
